

The South African Power Sector

Repair, Reform, Reimagine

A part-time position for a Research Intern is being offered at the University of Cape Town's Graduate School of Business to provide research support in a team working on the history of the South African electricity sector, the political economy of power sector reforms in South Africa, Eskom governance, and new developments in the sector.

The research work will be supervised by Catrina Godinho, a PhD Candidate in the Management Programme for Infrastructure Reform and Regulation (MIR). Further information on MIR's research activities and publications may be obtained at www.gsb.uct.ac.za/mir.

Applicants should have an Honours degree in Economics, Law, Political Science, Sociology, or a related discipline, and should demonstrate strong interest or experience in the energy sector.

Remuneration will be based on UCT rates for tutors and assistants - time commitment not more than 20 hours per week.

Applications should be submitted to catrinagodinho@gmail.com by 9 February 2018 and should include a covering letter indicating the applicant's interest and experience in this area, a curriculum vitae, full academic transcripts and a piece of academic writing (dissertation, essay, article).
